## Export From Cache to Microsoft SQL Server

Hello,

Our team is looking for a way to export all of our Cache SQL tables into Microsoft SQL Server. I have only found a method to export one table at a time into an ASCII file. We have over 170 tables so this would be very tedious and time consuming. Is there a way to directly export from Cache to SQL Server. Alternatively is it possible to export the entire database in a single shot or even multiple tables to text files?

Thanks!

[#Data Import and Export #Caché](#)

Product version: Caché 2018.1

\$ZV: Cache for Windows (x86-64) 2018.1.4 (Build 505120258U)
