Developer Community Release, March 2022

Hello and welcome to the March'22 Community Release!

We ' ve made some enhancements to your experience recently in the InterSystems Community:

- Brand new Community search
- General Community stats
- Facebook profile connection
- Post page updates: tags, author block, draft highlighting

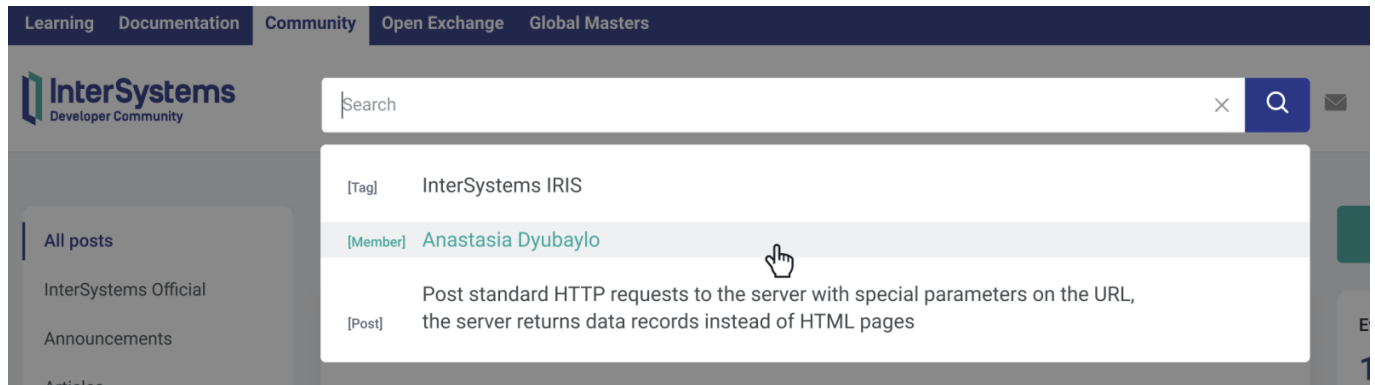

Let's have a closer look below.

Community Search

We have implemented a brand new search engine on the Community site. There are two search options:

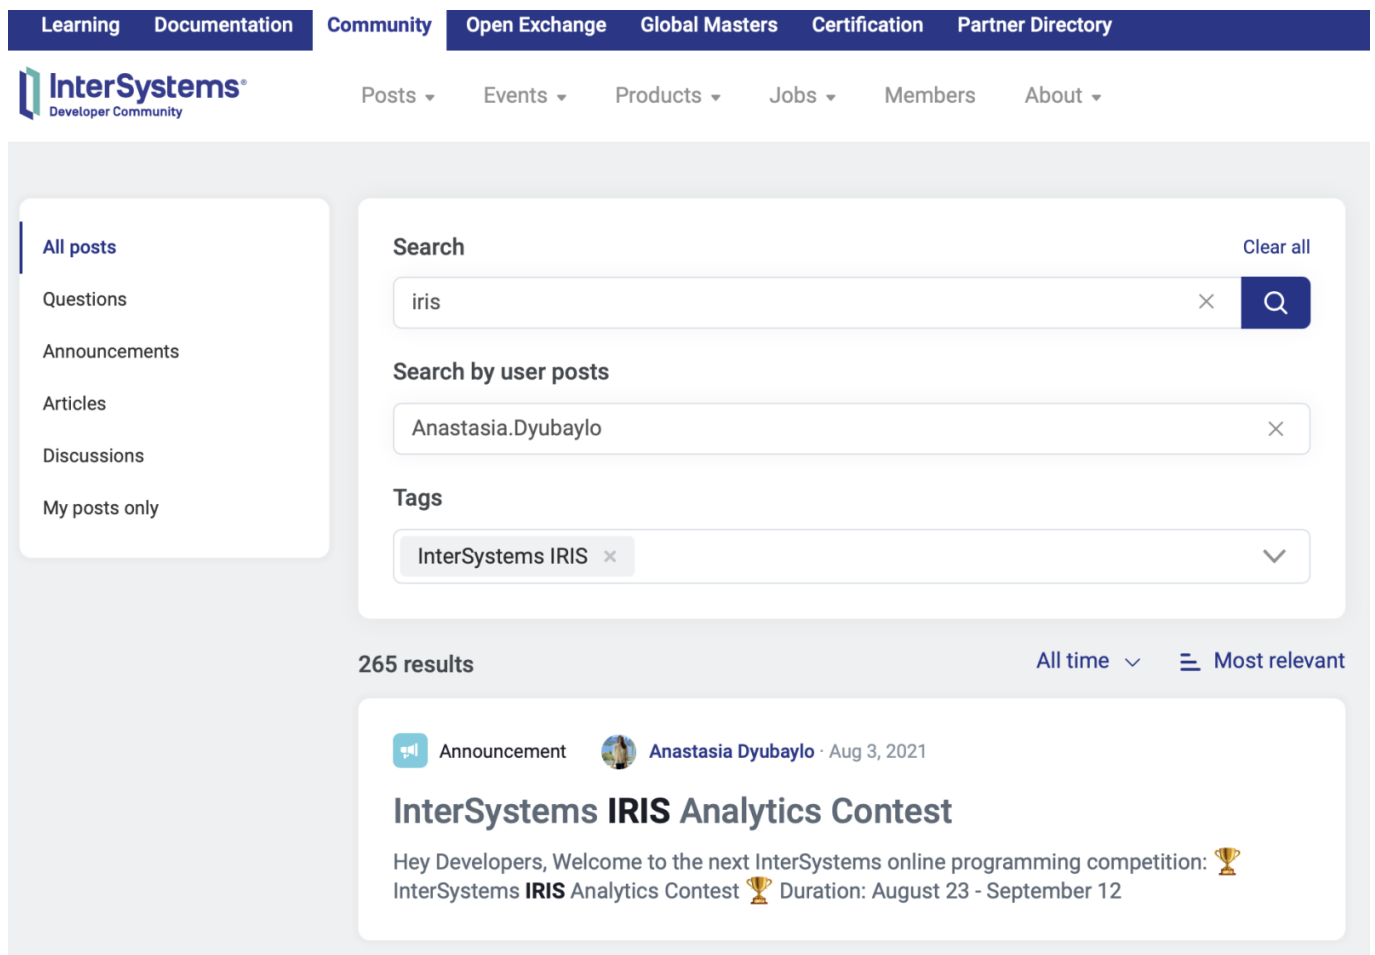

1. Quick Search
2. Advanced Search

With the DC Quick Search, you can easily find a post/tag/user and go directly to that webpage.

Didn't find anything suitable from the proposed options?

Try using the DC Advanced Search by clicking on the  button:

Here you can easily add advanced parameters for your search query:

- search by posts of a specific user
- search by specific tag(-s)
- search by specific post type or your posts only

You can also sort the results by time period and relevance:

265 results

→ All time ▾ ▮ Most relevant

Game Of Throne Analytics or How long is Arya's Stark List

Hi Devs!

Last weekend I had been testing the [newborn csvgen module](#) and was looking for a CSV file to test - thus I came across [an interesting datafile on Data.World](#) with Game of Throne episodes statistics. Death statistics. These folks documented all the murders through all the 8 seasons and noted where, who, from what clan with what weapon had killed another one.
So I imported it and made an IRIS Analytics dashboard.

Hope you enjoy our updates!

Submit your requests for improvements and bug reports on [DC GitHub](#). Or post your suggestions in the comments to this post.

Stay tuned!
