Errors when using TestCoverage, ':ERROR #5002: ObjectScript error:'

Hello everyone!

When running the command

```
do ##class(TestCoverage.Manager).RunTest( "/nodelete", .userParams )
```

I now get the following error.

ERROR #5002 : ObjectScript error: <FUNCTION>zStart+45^%Monitor.System.LineByLine.1 <===== **FAILED**
TestCoverage.Manager:OnBeforeAllTests:::

```
Taking snapshot of code and CLS/MAC/INT mappings:  
.039277 seconds  
TestCoverage.Manager:OnBeforeAllTests begins ...  
LogStateStatus:0:TestCoverage.Manager:OnBeforeAllTests:ERROR #5002: ObjectScript error: <FUNCTION>zStart+45^%Monitor.System.LineByLine.1 <===== **FAILED**  
TestCoverage.Manager:OnBeforeAllTests:::  
TestCoverage.Manager:OnBeforeAllTests failed  
ERROR #5002: ObjectScript error: <INVALID OREF>zOnAfterSaveResult+3^TestCoverage.Manager.1
```

These tests run fine in Studio.

Also the TestCoverage works fine on all the other namespaces. So far i'm experiencing this problem on this 1 namespace.

The solution of stopping the LinebyLine monitor doesn't help like in the case of ERROR #6060

Can someone please point me in the right direction?
