Insert Row by enforcing ID

Hi Guys,

Can I insert a new row and enforcing my own ID not the default id increment?

```
&sql(INSERT INTO Sample.Person
 (ID,Name,SSN)
 VALUES ('205','Swift,Jonathan','111-22-3333'))

IF (SQLCODE = 0) {
 Write "New Person inserted with ID: ", %ROWID,!
 }
else
{WRITE !,"SQLCODE=",SQLCODE," ",%msg }
```

I tried this in samples and got the below error:

SQLCODE=-111 INSERT of Default Only RowID Field 'ID' in table 'Sample.Person' not allowed

thanks
