Accessing %Monitor.System.License properties

I am writing a Python tools I want to access the %Monitor.System.License properties:

1. AvailableDist
2. AvailableLocal
3. MaxUsedDist
4. MaxUsedLocal
5. CurrentUsedDist
6. CurrentUsedLocal

Initially I want to develop Objectscript to verify access to the properties. But I can not figure the proper syntax.

I first attempted:

```
set ans = ##class(%Monitor.System.License).AvailableDist
```

which failed.

I tried another approach:

```
set ans = ##CLASS(%Monitor.System.License).%GetParameter("AvailableLocal")
```

which also failed. There is open method so it appears access options are limited. I am missing something about this class. I have not encountered such issues accessing other classes. Any help in either objectscript or Python form would be helpful.
