Run multiple Update sql queries

Hi everyone, how do you run multiple quires?

I have tried couple of different ways, but not working.

```
SET sql = 2
```

```
Set sql(1) = "UPDATE QUERY"
```

```
Set sql(2) = "UPDATE QUERY"
```

```
Set sqlStatement=##class(%SQL.Statement).%New()
```

```
Set sc1=sqlStatement.%Prepare(.sql)
```

```
If $$$ISOK(sc1) {
```

```
Set tResult = sqlStatement.%Execute()
```

```
}
```

```
else{
```

```
$$$LOGERROR("Failed")
```

```
}
```
