Help to Accessing Foreign key property using JSON Object

Given I have a property

```
Class All.AllBooks Extends %Library.Persistent
{
    Property ID As %Integer;
    Property Title As User.Book;
}
```

In the class method

```
ClassMethod GetABookById(id As %Integer) As %Status
{
    SET MyBooks = ##class(All.Allbooks).%OpenId(id)
    SET obj = {
        "ID" : (MyBooks.%Id())
        "Title" : (MyBooks.Title)
    }
    WRITE obj.%ToJSON()

    Quit 1
}
```

How do Access the foreign key in JSON() data
