## Connecting an IRIS container's SQL Gateway Connection to MySQL on Apple M1

I'm trying to connect to a MySQL database through a SQL Gateway (type JDBC) on a MacBook M1. Can't get the connection working, anybody any experience on this topic?

The screenshot shows a configuration window for a SQL Gateway connection. The 'Type of connection' is set to 'JDBC'. The 'Connection name' is 'WGI-JDBC'. The 'User' is 'root' and the 'Password' is masked with asterisks. The 'Driver name' is 'com.mysql.jdbc.Driver'. The 'URL' is 'jdbc:mysql://realhost:3306/Werbesten'. The 'Class path' is 'C:\Users\joost\mysql-connector-java-8.0.29.jar'.

Type of connection:	JDBC
Connection name:	WGI-JDBC
User:	root
Password:	*****
Driver name:	com.mysql.jdbc.Driver
URL:	jdbc:mysql://realhost:3306/Werbesten
Class path:	C:\Users\joost\mysql-connector-java-8.0.29.jar
