## Add/Call objectscript xml class methods

Hi All,

I have been given the following xml class file with objectscript code that has methods that I need for file conversions. These method implementations will do necessary conversions but I don't know how to add it to Iris studio and run it as a task or maybe if it must be put on any location and call each method from the terminal and even if so how do I then call it.

Please advise how to go about this.

```
<?xml version="1.0" encoding="UTF-8"?>
<Export generator="IRIS" version="26" zv="IRIS for Windows (x86-64) 2020.1.1 (Build 408U)" ts="2022-02-01 16:19:05">
<Class name="User.Ready.ConvertCSV">
<Super>%RegisteredObject</Super>
<TimeChanged>66141,58621.837791</TimeChanged>
<TimeCreated>65814,24388.941304</TimeCreated>

<Method name="DoAll">
<ClassMethod>1</ClassMethod>
<Implementation>
</Implementation>
</Method>

<Method name="ConvertN">
<ClassMethod>1</ClassMethod>
<Implementation><![CDATA[
  </Implementation>
</Method>

<Method name="ConvertI">
<ClassMethod>1</ClassMethod>
<Implementation><![CDATA[
  s filename = "C:/ready/In/I.csv"
  s newFilename = "C:/ready/Out/I.csv"

]]></Implementation>
</Method>

<Method name="ConvertS">
<ClassMethod>1</ClassMethod>
<Implementation><![CDATA[
  s filename = "C:/ready/In/S.S.csv"
  s newFilename = "C:/ready/Out/S.csv"
</Implementation>
</Method>
</Class>
</Export>
```
