Breaking: Rick VanNess, Product Development Director at Rhodes Group, to Present Session on Fighting Hepatitis C with Data

Hi Community (especially developers in healthcare):

Just learned that our customer, Rhodes Group, will be giving a session on its work fighting hepatitis C in New Mexico. Below is the full session description.

[Register for Global Summit and this session today.](#)

Breaking Data Silos Through Strategic Healthcare Partnerships

Rick VanNess, Director, Product Development, Rhodes Group
Wednesday, June 22, 3:30 p.m. PDT

Learn how Rhodes Group, a software company serving laboratories and health systems, leveraged aggregated data to address public health needs around hepatitis C in New Mexico. You'll get background on how laboratory data is uniquely positioned to address a variety of large-scale needs. We'll explore lessons learned, discuss some of the technical architecture, and share how we plan to leverage this data and more to address future challenges. Intermediate level.
