## FHIRaas smart-configuration error : "This endpoint does not have SMART on FHIR capabilities defined"

Hi,

Currently I am working to develop smart on FHIR app with FHIRaas with the help of fhirclient.js and facing one issue that .well-known/smart-configuration is raising following error "This endpoint does not have SMART on FHIR capabilities defined" Below snapshot is for reference:

The screenshot shows a REST client interface with the following details:

- Method: GET
- URL: `https://fhir.tkdq5hw1zk6j.static-test-account.isccloud.io/.well-known/smart-configuration`
- Query Params: (Empty)
- Body: (Empty)
- Headers: (10)
- Test Results: (Empty)
- Response Format: JSON
- Response Content (Pretty):

```
1  {
2    "resourceType": "OperationOutcome",
3    "issue": [
4      {
5        "severity": "error",
6        "code": "exception",
7        "diagnostics": "<HSFHIRErr>NoSMARTOnFHIRCcapabilities",
8        "details": {
9          "text": "This endpoint does not have SMART on FHIR capabilities defined"
10       }
11     }
12   ]
13 }
```

Looking forward to resolve the above issue or workaround

Thanks
