## Collapsible or expandable Tablepane

Hi Guys,

How do I add another tablepane or gridview to make my tablepane look like expandable and collapses back as in the below pic?

so basically I would like to add a child tablepane or gridview for each row that populate the related details for it.

The screenshot shows a table with columns: Active, Category, Name, LocType, Serial No, Alt Code, Qty, and Equipment. One row is expanded to show a sub-table with columns: Item, Description, SX3 Serial, BLE UID, Type, Location DE/NDE, Orientaiton, and Add Image (Button). The expanded row is highlighted with a yellow box.

Active	Category	Name	LocType	Serial No	Alt Code	Qty	Equipment		
<input type="checkbox"/>	1	MOTOR				0	1		
<input type="checkbox"/>	1	MOTOR				1	1		
<input type="checkbox"/>	1	MOTOR				0	1		
<input type="checkbox"/>	1	MOTOR			021004025	1	1		
<input type="checkbox"/>	1	MOTOR				0	1		
<input type="checkbox"/>	1	MOTOR			111003371	2	1		
		<b>Item</b>	<b>Description</b>	<b>SX3 Serial</b>	<b>BLE UID</b>	<b>Type</b>	<b>Location DE/NDE</b>	<b>Orientaiton</b>	<b>Add Image (Button)</b>
		▶ VibeTAG				Driven	DE	Axial	Image
		▶ VibeTAG				Driven	DE	Axial	Image
<input type="checkbox"/>	1	MOTOR				0	1		
<input type="checkbox"/>	1	MOTOR				1	1		

thanks
