Learn FHIR. Catch Up on FHIR Development. Witness What FHIR Can Do. All at Global Summit 2022

Plenty to Get All FHIR'd Up About

Four-Hour Workshop, "Sneak Peek" Session, Experience Lab, FHIR Startup Accelerator Winners & More

Global Summit, June 20 - 23, Seattle

[Register Now](#)

Hi Community:

Just thought I'd let you know about all the HL7[®]FHIR[®] content we've planned (and finalized) for Global Summit.

There ' s something special this year for anyone new to the standard and for those of you who don ' t have technical backgrounds. On Monday afternoon, June 20, we ' re hosting a special four-hour workshop led by Russ Leftwich, MD, with Laura Heermann Langford, Ph.D., RN, FAMIA. You ' ll learn what FHIR[®] is, how it works (through a hands-on exercise), and how it is revolutionizing data interoperability and the healthcare data standard of the future.

Then Product Manager Patrick Jamieson will lead two FHIR sessions, one on the FHIR Shorthand and the other a "sneak peek" at our InterSystems IRIS[®] SQL Builder, an exciting new way to perform analytics using data from your FHIR Repository.

Get hands-on with InterSystems Cloud Services, transform healthcare messages into FHIR messages, and run queries against them in this Experience Lab: "Using InterSystems Cloud Services with FHIR Data."

Finally, you'll get to view the work of finalists in our FHIR Startup Incubator Program in a room set aside for

meetings and demos.

So don't miss it. [Register Today](#)
