Using a Service to get data (Inbound or outbound adapters)

Hi Guys.

I'm a newbie in productions and services and I'm using this code to get HTTP response with JSON file, is a way to do this via a production service?

```
Set Httprequest = %HttpRequest()
Set Httprequest.Https = 1
Set Httprequest.Timeout = 30
Set Token = "sometokenvalue"
set Httprequest.ContentType = "application/json"
set Httprequest.Headers = {"Authorization": "Bearer " + Token}
//S Resp=Httprequest.HttpResponse.Data.ReadLine()
Quit Resp
Set Resp=Httprequest.HttpResponse.Data.Read()
```

Thanks
