Webinar in Spanish: "SAM: Monitoring InterSystems IRIS with Grafana and Prometheus"

Hi Community,

We're pleased to invite you to the upcoming webinar in Spanish called "[SAM: Monitoring InterSystems IRIS with Grafana and Prometheus](#)".

Date & Time: June 15, 4:00 PM CEST

Speaker: [@Pierre-Yves Duquesnoy](#), Sales Engineer, InterSystems Iberia

The webinar is aimed at system administrators who want to monitor one or some InterSystems IRIS platforms and its applications at a glance. It is also aimed at DevOps who have to add application or interoperability metrics to the monitoring.

SAM (System Alerting & Monitoring) is the perfect tool to monitor InterSystems IRIS data platforms. It offers an overall picture of the systems to be monitored, and facilitates alert management in any monitored systems.

During the webinar, we'll show SAM architecture and its installation; and we'll start to monitor different InterSystems IRIS clusters. We'll also extend the existing metrics to monitor other application metrics.

[Register today and enjoy!](#)
