Senior Developer

Client: Northwell Health

Role: Senior Developer

Location: Remote

Duration: 6+ Months

Description:

Team Overview:

The FHIR Platform team is tasked with providing the core infrastructure in providing access to Northwell HIE patient data complying with HL7 FHIR and USCDI standards.

Position Summary:

The primary purpose of this role is to provide technical design, coding, testing and documentation for multiple components in the FHIR solution.

Responsibilities:

- Develop end-to-end solutions, participate in code reviews, unit test and deploy.
- Documentation of technical designs and functionality
- Attend daily scrum meetings
- Identify and articulate design methodology and best practices
- Provide support during testing and participate in go-live meetings.
- Testing and deploying cloud-based solutions
- Troubleshooting, debugging, maintaining, and improving existing software

Academic and Professional Qualifications:

- BA or BS degree preferred and/or other relevant combination of training and experience

Experience:

- 3-5 years of experience in cloud environments and implementing software solutions
- Experience working on large-scale software projects
- Experience developing secure software systems based upon industry specifications
-

Preferred Experience:

- Python, .NET/C#, SQL, Terraform, Bash, PowerShell
- Google Cloud Platform – Dataflow, Pub/Sub, BigQuery, Healthcare API, Monitoring
- Experience in high-volume environments
- Authorization/Authorization – Azure AD, OAuth 2.0 Flows
- FHIR / HL7 / USCDI
- REST and OpenAPI
- Shopify Liquid Template Language
- Datadog Cloud Monitoring
- Intersystems knowledge a plus
