Write JSON file in HTTPREQUEST

Hi Guys,

how can I write a json file in httprequest, I'm using the below but when I check what's in mystring it's actually truncated and doesn't include all my file?

```
Set stream=##class(%FileBinaryStream).%New()
S FilePath=
"D:/AlliedInterfaceData/ResponseFiles/CollectionData/CollectionGood/CollectionGood9431312.json"
Set File = ##class(%File).%New(FilePath)
Do File.Open("R")
Set Line = File.Read(1000)
While (File.Read(1000)='') { S mystring=mystring_File.Read(1000)
}
Set Httprequest=##class(%Net.HttpRequest).%New()
Set Httprequest.SSLConfiguration="RTLS"
Set Httprequest.Server="vibra-api-dev.azurewebsites.net"
Set Httprequest.Timeout=30
Set Httprequest.Https=1
set Httprequest.ContentType="application/json"
Do Httprequest.SetHeader("Accept","application/json")
Do Httprequest.SetHeader("Accept-Language","en_US" )
Do Httprequest.SetHeader("Authorization","Bearer " ^Token)
D Httprequest.EntityBody.Write(mystring)
Set tSc=Httprequest.Post("/API/SENSORS/VIBRATION")
Set StateCode=Httprequest.HttpResponse.StatusCode
Set State=Httprequest.HttpResponse.StatusLine
Quit StateCode_"|"State
```

Thanks
