Reading a CSV file into a Variable

Hello! I need help reading a file and putting the contents into variables.

File path would be, c:\temp\zipcitystate.csv or txt

Data looks like this

00501,Holtsville,NY
00544,Holtsville,NY
00601,Adjuntas,PR
00602,Aguada,PR

I need to add the first area to variable ZIP, Second to CITY and third to STATE. they are separated by a comma.

Any help would be appreciated
