## Showcasing Serenji debugger at the Global Summit

Come and say hi to us in the Partner Pavilion at the Global Summit!

We ' ll be showcasing our Serenji on-the-spot debugger which has undergone some big changes in the last year—users can now enjoy a seamless debugging experience with zero configuration, along with taking advantage of the latest features in VS Code itself, enabling users to smoothly identify and quickly fix errors in your code, contributing to the production of quality, maintainable code.

If you want to see Serenji in action look for us in the Partner Pavilion, we'll be on hand to show you a demo. Prospective users are also welcome to join our User Group Session during the lunchtime session on Wednesday, June 22nd. Email [laurelj@georgejames.com](mailto:laurelj@georgejames.com) to let us know you'll be there.

### Showcasing Serenji debugger

in the Partner Pavilion at InterSystems Global Summit,  
20th - 23rd June, Seattle WA

Join our User Group Session to  
see Serenji in action:

When - Wednesday, June 22nd
