## Angular Seachbar with Rest API

Hi guys,

has anyone done a simple angular searchbar with a REST API on Caché in the back?

I've done this [Let's write an Angular 1.x app with a Caché REST backend](#) here in the community and it works fine for me.

The REST in Caché is already developed but im hanging at the searchbar in Angular, don't know how to solve this.

Has somebody an example to help me out?

Any help would be appreciated.

[#Angular](#) [#Frontend](#) [#REST API](#) [#Caché](#)

Product version: Caché 2016.1
