## Comparing Dates

Hi,

Any suggestion on how to compare dates? Below is my code but it does not seem to work.

```
USER>w $zdate(zdateh(x,8),1) > $zdate($zdateh(y,8),1)
```

When I set x to "06/01/2022" and set y to "04/01/2022" gives me an output of 1

When I set x to "09/01/2019" and set y to "04/1/2022" still gives me an output of 1

Any help is appreciated.

Thanks!
