## George James Software at the Global Summit

Only a few days to go until the Global Summit! George James Software will be on hand to talk about any projects you may have on the horizon, such as application development, data and platform migration, system integration, training, and support – we can work with you to find practical and maintainable solutions that support the growing needs of your organization.

We're also running a User Group Session on Wednesday, July 22nd at 12pm. It's a great opportunity to find out more about our tools and ask us (and current users!) any questions.

Look out for us in the Partner Pavilion, or email me at [laurelj@georgejames.com](mailto:laurelj@georgejames.com) to book onto the User Group Session or a meeting with a member of the team.
