## Inline IF and assignment

I'd like to to assign a value to a variable, depending on the results of a condition. The equivalent of what can be done in c++ with the following:

```
(a>b) ? a=1:a=0;
```

Or in python:

```
a = 1 if a>b else 0
```

This makes the code much more readable and compact.

In objectscript it would be:

```
if (a>b){  
    a=1  
} else{  
    a=0  
}
```
