Exporting to Excel with %DisplayFormatted

Hi Guys,

I'm using the below to export a query result to excel file and the only file type is .csv (100) but the resulting has two problems,

first the row header is including the field type and second the resulting file is a tab delimited so columns aren't properly separated (see attached below)

```
set st = ##class(%SQL.Statement).%New(2,"Sample")
set sql = "select ID, name from MyClass"
do st.%Prepare(.sql)
set type="csv"
set rs = st.%Execute()
do rs.%DisplayFormatted(type,"C:/Temp/report")
```

	A	B	C
1	--ROW(ID INTEGER	Name VARCHAR(115))	
2	1Loan Instrument		
3	2LOAN SET STRYKER Delta Plating System Inst & Implant		
4	3Forceps Tissue Vascular Cooley Straight 19cm		
5	4Forceps Debakey Gerald 1.2mm x 180mm		
6	5Forceps Gerald Atrau 203mm		
7	6Scissors Jamison Tenotomy Curved		
8	7Scissors Dietrich Coronary Extra Light 25°		
9	8Right Angled Dissector Bailey 60° 181mm		
10	9Right Angled Dissector Bailey 90° 181mm		
11	10Right Angled Dissector Bailey 30° 181mm		
12	11 Clamp Klintmalm Liver Jaw 6.5CM JAW		
13	12Clamp Cross Ductus Neo 105mm		
14	13Hook Cushing Nerve 280mm		
15	14Sucker Cardiotomy Pemco		
16	15Cannula Irrigating		
17	16Forceps Stardust Micro Ring 180mm		
18	17Scissors Dietrich Coronary Extra Light 60°		
19	18Needleholder Crilewood 23cm		
20	19Needleholder Micro Clicking Dr Winlaws # 6006-82 - CHW		
21	20Needleholder Micro Clicking		
22	21Needleholder Crilewood 180mm		
23	22Cannula 12cm		
24	23Trocac 12 cm		
25	24Cannula 14cm		
26	25Container & Lid		
27	26Tray Container Metal Small With Lid		

Thanks
