Meet Niangang Huang - New Developer Community Moderator!

Hi Community!

We're pleased to welcome [@water_huang](#) as our new Moderator in the Developer Community Team!

**Welcome to our Team,
@Niangang Huang !**

Let's greet [@water_huang](#) with big applause and take a closer look at his bio!

[@water_huang](#) (黄念刚) is a developer at Southwest Technical Support Center of Mediway (东华医为) .

Here are some words from [@water_huang](#):

- Since I joined Mediway in 2012, I started to learn InterSystems technologies and integrated platform. I used the early versions of InterSystems Caché, Ensemble. Ensemble 2016 is my main development tool at present.
- I have worked in HIT for about 10 years, am familiar with HL7 V2/ V3, and have rich domain knowledge.
- InterSystems provides an excellent integration platform and it brought great convenience to our business. I hope that such excellent technology can create value for more peers and partners. I also hope to communicate with you in the Developer Community and share my experience here as well as learn from your excellent practices. Let's grow together and make progress together!

Thank you and congratulations, [@water_huang](#)!

Hope you will be a great Moderator! We wish you a great journey in DC!
