AWS EFS, EBS Shared e SQS Support?

Hello.

Our scenarios need to persist messages in the orchestrator. Our Iris Orchestrator is an ephemeral pod with no persistent disks running on AWS EKS in multiple AZ.

We want to know if the iris orchestrator has:

- AWS EFS Support
- Integration with AWS SQS
- Sharing to the same AWS EBS.

Our challenge is that when the pod receives a new deploy or is restarted we are losing messages.

What would be the best solution that you come up with?

We appreciate your attention and kindness.

Yours sincerely,

Alfred
