XML Projection when edit and resend- why not available to edit XML- custom classes

I'm not sure why on some message you cannot edit/resend and change the information in the message

i.e.

Property property1 As Messages.MesaageType1;

Property property2 As Messages.MesaageType2;

Property property3 As list Of Messages.MesaageType3;

All extend Extends (Ens.Request, %XML.Adaptor)

is there anything we are missing?
