## The First Demo Day of InterSystems FHIR Startup Incubator — Caelestinus

Hi Community!

We ' re so glad to announce that InterSystems FHIR startup incubator — [Caelestinus](#) held its first virtual Demo Day on June 29th!

16 startups have showed off their products and solutions built with [InterSystems FHIR Server](#), or [IRIS for Health](#) or [Health Connect](#) to an audience of about 15 investors & partners.

The Demo Day is the result of a four-month journey — the equator of the incubator, in which startups have explored InterSystems tech, validated their ideas and presented it on the first Demo Day. In case you missed it, enjoy watching it on [InterSystems Developers YouTube](#):

[The First Demo Day of InterSystems FHIR Startup Incubator — Caelestinus](#)

[Here](#) is the list of presenters with pitch decks of the startups.

We're very proud of progress that startups made in such a short time!

Enjoy watching and stay tuned!
