Adding multiple rows to a projected SQL table - Persistent Object

Hi

I'm trying to add multiple rows at a time to a SQL table for a persistent object, but I can't seem to get the syntax correct. When I try the below it doesn't work.

```
INSERT INTO Sample_Table.Accounts (Account, AccountName, Bank)
VALUES
('123456', 'AccountNameOne', 'BANK1'),
('654321', 'AccountNameTwo', 'BANK2')
```

Thanks

Peter
