How to read from Ens.StreamContainer

Hi,

I am receiving a JSON File as Stream container Using pRequest As Ens.StreamContainer and output as Output pResponse As %Persistent in a Custom Business Operation

Please find the code below

```
Method OnMessage(pRequest As Ens.StreamContainer, Output pResponse As %Persistent) As %Status
{
    Set tFilename=..Adapter.CreateFilename(##class(%File).GetFilename(pRequest.OriginalFilename),..Filename)
    Set tSC=..Adapter.PutStream(tFilename, pRequest.Stream)
    Quit tSC
}
```

Question:How can i extract name,DOB,SSN from the pRequest and save the same values in SQL persistant table?

Please find the JSON Output below

```
{"name":"PATID1234^5^M11^ADT1^MR^GOOD HEALTH  
HOSPITAL423456789^^^USSSA^SS","DOB":"19610615","SSN":"ADT1"}
```

Thanks,

Smythee
