Run Class method under HSCUSTOM on terminal

Hi All,

I have a method like this and I want to be able to see the results on the terminal, how do I run this method on a terminal to display the results of this SQL query?

Method ResponseTimeCurrentMonth(namespace)

```
{
set oldNamespace = $Namespace
new $Namespace
    set $Namespace = namespace

    s timeTaken = 0, InDate = ""
    #SQLCompile Select=Display
    &SQL(select InDate, AVG(TimeTaken) into :InDate, :timeTaken from (select SessionId,
(TimeCreated) InDate, MIN(TimeCreated) StartTime, MAX(TimeProcessed) EndTime, DATEDIFF('ms',MIN(
TimeCreated),MAX(TimeProcessed)) TimeTaken FROM Ens.MessageHeader where status =
'Completed' and Resent is null and Month(TimeCreated)
= Month(currentdate) group by SessionId group by Year(InDate), Month(InDate)) new $Namespace
    set $Namespace = oldNamespace
do ..SetSensor("ResponseTimeCurrentMonth",timeTaken,namespace)
}
```
