## SAM - Custom Application Metrics

Now that I have SAM up and running, out of the box I would like to add some Application Metrics. Does anyone have templates, or have suggested classes that someone could use to add custom metrics to SAM? Maybe we should start a repository somewhere? Or would someone be willing to share custom metrics on the Open Exchange?

What I am looking to do is capture the overall HL7 message and header count per day.

- `SELECT Count(ID) FROM Ens.MessageHeader WHERE TimeCreated > <date> and TimeCreated < <date>`
- `SELECT Count(ID) FROM EnsLib.HL7.Message WHERE TimeCreated > <date> and TimeCreated < <date>`
- `SELECT Count() FROM EnsLib.HL7.Message HL7 LEFT JOIN Ens.MessageHeader hdr ON HL7.Id=hdr.MessageBodyId WHERE hdr.MessageBodyId IS NULL AND HL7.OriginalDocId IS NULL`

Thanks
