Inbound adapter URL

Hi Guys,

I'm a newbie in Ensemble productions and I've been asked to create an Inbound adapter and specify a port of which clients can send through JSON files and I did as attached, but now I've been asked to provide the URL to give to our clients so they send their JSON files to and I don't know what URL is should look like!?

Thanks

#Ensemble
Product version: Ensemble 2014.1
