Changing the order of SQL Fields

Hello! I am currently creating a class for a small error trap. I have it working and all is good but I really want to change the order of the fields in the SQL return from Alphabetical to something else.

The current Order is ID, ActionType, ErrorCount, ErrorDetails, Model, ResultCode, ResultMessage, Stock and Yard

I would really like for the field order to be ID, Yard, Stock, Model, etc.

Example of current order,

Structure (Query 1)	Output	Data	SQL 1	SQL 2	SQL 3	SQL 4				
ID	ActionType	ErrorCount	ErrorDetails	Model	ResultCode	ResultMessage	Stock	Yard		
411588051125061101-4118000-001	DELETED	1	Stock already sold	CAV	Failure	24	T112	2		

Is this possible?

Thanks in advance!!
