Looking for a Fully Remote Intersystems IRIS Developer! Long Term Lucrative Opportunity!

Hi everyone!

I am recruiting on a fully remote Intersystems Developer. This role will be a long term contract to begin with high likelihood of extensions or conversion permanent. Please check out the job description down below and feel free to send me an email with your resume: Spencer.Frey@insightglobal.com

The Healthcare Integration Developer is responsible for designing, developing, and deploying the complex near real-time and real-time data interoperability solutions using Healthcare industry-standard data formats/specifications (HL7, FHIR, EDI, etc.). The role is responsible for consulting with internal customers, team members, and external vendors to design, build, test, and manage application services. A key responsibility is strategically collaborating with cross-functional teams to understand operational needs, perform gap analysis and convert customer requirements into custom interoperability solutions using in-depth knowledge of healthcare business processes and data integration optimization. This role is the internal expert in system capabilities and architectural interoperability standards. Also is responsible for maintaining system changes, documenting functional and technical requirements, mapping process flows, establishing test plans, conducting system testing, establishing user manuals, and administering training related to the interoperability code.

Must Haves:

2+ years experience with Intersystems Development

2+ years experience with Intersystems IRIS areas of APIM, FHIR Server, and Longitudinal Patient record

2+ years experience with HL7

2+ year experience with one or more programming language (C#, Python, TCL, ESQL, M, T-SQL, JavaScript)

Healthcare Experience

Plus:

Experience with AWS or Azure Cloud Services

Experience with FHIR

Epic experience - inner connect (API tool), chronicles, custom development

Bachelors Degree

Experience with Healthcare Interoperability/Interface engines
