Email: e.sokolova@hellotech.agency

Telegram: @katlsokolova

The project is concerned with Data Management and Healthcare Information Systems within a large medical system already in production. The areas of development will include patient portal, doctor portal and intermediate layer to provide modules communications.

Technology on the project:

- Iris for health, Health share
- Cache and Docker
- Linux DevOps (run on Unix machine via ssh interface)
- SQL and Postgres
- Python (as plus)

What we can offer you:

- A great team of professional and creative engineers who are willing to share their experience and knowledge
- Working on international projects - market leaders
- Opportunity to work with modern technology
- About Development: we value the professional development of our employees, that's why you

will have the opportunity to attend different trainings, conferences and language courses

- About health and sports: we care about our employees, that's why we have flexible working hours, remote working, and we also provide Multisport cards and 5 weeks of holidays and 3 sick days
- About Leisure: we organize various events, quizzes, corporate challenges and other fun activities.
