## New Open Exchange Feature - ObjectScript Quality status

If you utilize [Quality Code Analyzer](#) in your open source application this will be shown on Open Exchange:

1. On the [main OEx page](#) you can filter all the apps which passed Object Script Quality test

### Show only

- ☐ Bookmarked by me
- ☐ Subscribed by me
- ☐ Products with demo
- ☐ Applications with ZPM
- ☒ ObjectScript quality test passed

2. On the public application page ([example](#)) you will see that in info box:

# New Open Exchange Feature - ObjectScript Quality status

## ObjectScript syntax for GitLab

GitLab provides syntax [highlighting](#) on all files through the Rouge Ruby gem. It attempts to guess what language to use based on the file extension, which most of the time is sufficient.

This is a repository to test easily the current status of [rouge project fork](#) to support ObjectScript syntax. It allows to have Ruby environment on docker ready for testing.

For more information the community article is [available here](#).

## Installation

[GitHub](#)

## Rating

0 ★ (0)

## ObjectScript quality test

 Passed

 Updated on 06 September 2022

[ObjectScript quality report](#)

## Category

[Developer Environment](#)

3. On the page where you [manage your apps](#) you will see the quality check status:

No Data - if the Quality check is not installed in your repo

Passed - if the code passed the test

Failed - if the test was failed. This won't be shown on public app page

App name	Company	Status	Last released ↓	Rating	Code quality check	
 New app		 Draft		0 (0)	 No data	  

UPD! The file to add to your repo now you can also find on Open Exchange [Community objectscriptQuality](#)

[#Open Exchange](#)
