Routing REST messages inside interoperability-test

I deployed online demo here:

<https://production-monitor.demo.community.intersystems.com/csp/user/EnsPortal.ProductionConfig.zen?PRODUCTION=dc.Demo.Production#>

I updated several settings (File paths and URLs) and I switched Dispatch class to dc.rest.GenericService.

I resent the message from File Service. I saw messages received by both Auth and Api services.

Api process does not (yet) return the desired response. More to come ...
