## data2day and InterSystems look forward to welcoming you in Karlsruhe, Germany

Hi Developers,

We have another great opportunity for you to join us in Germany for a Conference for Data Scientists, Data Engineers and Data Teams that will be held in Karlsruhe!

Date: 20 – 21 September 2022

Venue: IHK Karlsruhe, Lammstr. 13-17, 76133 Karlsruhe, Germany

Our speaker Markus Mechnich will be talking about (Smart) Data Fabrics during the session titled "Putting an end to data silos: making better decisions, pain-free". He will discuss the challenge of accessing and merging different systems that store data that is rarely homogeneous and/or synchronous enough for a comprehensive evaluation and using it to make sound business decisions.
