[Medical Images Standar] DICOM

Hello,

We are very interested about studying DICOM in deep, both the standar itself and how it is related to HealthShare.

Could you please point us to some good references: documentation, courses, books, pdfs, explanations; to understand what is this standard about and how works.

Thanks for your replies

We have read:

<https://dicom.nema.org/medical/dicom/current/output/html/part01.html>

<https://docs.intersystems.com/irisforhealthlatest/csp/docbook/DocBook.UI...>

Could you spot for us and reference some good documentation and/or videos or courses to know, understand and read about DICOM?

We handle both English and Spanish

Thans for your time and replies
