[Off-Topic] What is your recommended way to...?

Hello,

I was wondering if there is a way, or what is your recommended way to generate, or develop some kind of deep interest or even some joy, love, or excitement towards coding, programming, software developing. Specifically for people aged between 20 and 30 years old.

I am aware of some programming games like the following ones:

<https://wintrmut3.itch.io/maelstromexe>

<https://theov.itch.io/automaton>

<https://importantlittlegames.itch.io/codemancer-ch-1>

Also, there are some coding platforms with online exercises and/or challenges:

<https://www.codewars.com/dashboard>

<https://codecombat.com/>

<https://www.codingame.com/>

Plus, there are some online courses platforms as Udemy, Udacity and more with online web courses

However, how would you recommend to people aged between 20 and 30 to start, maintain, or reboot their joy, excitement, love or interest for coding and software development?

Greetings and thanks for your replies
