InterSystems extension for Docker Desktop is now published

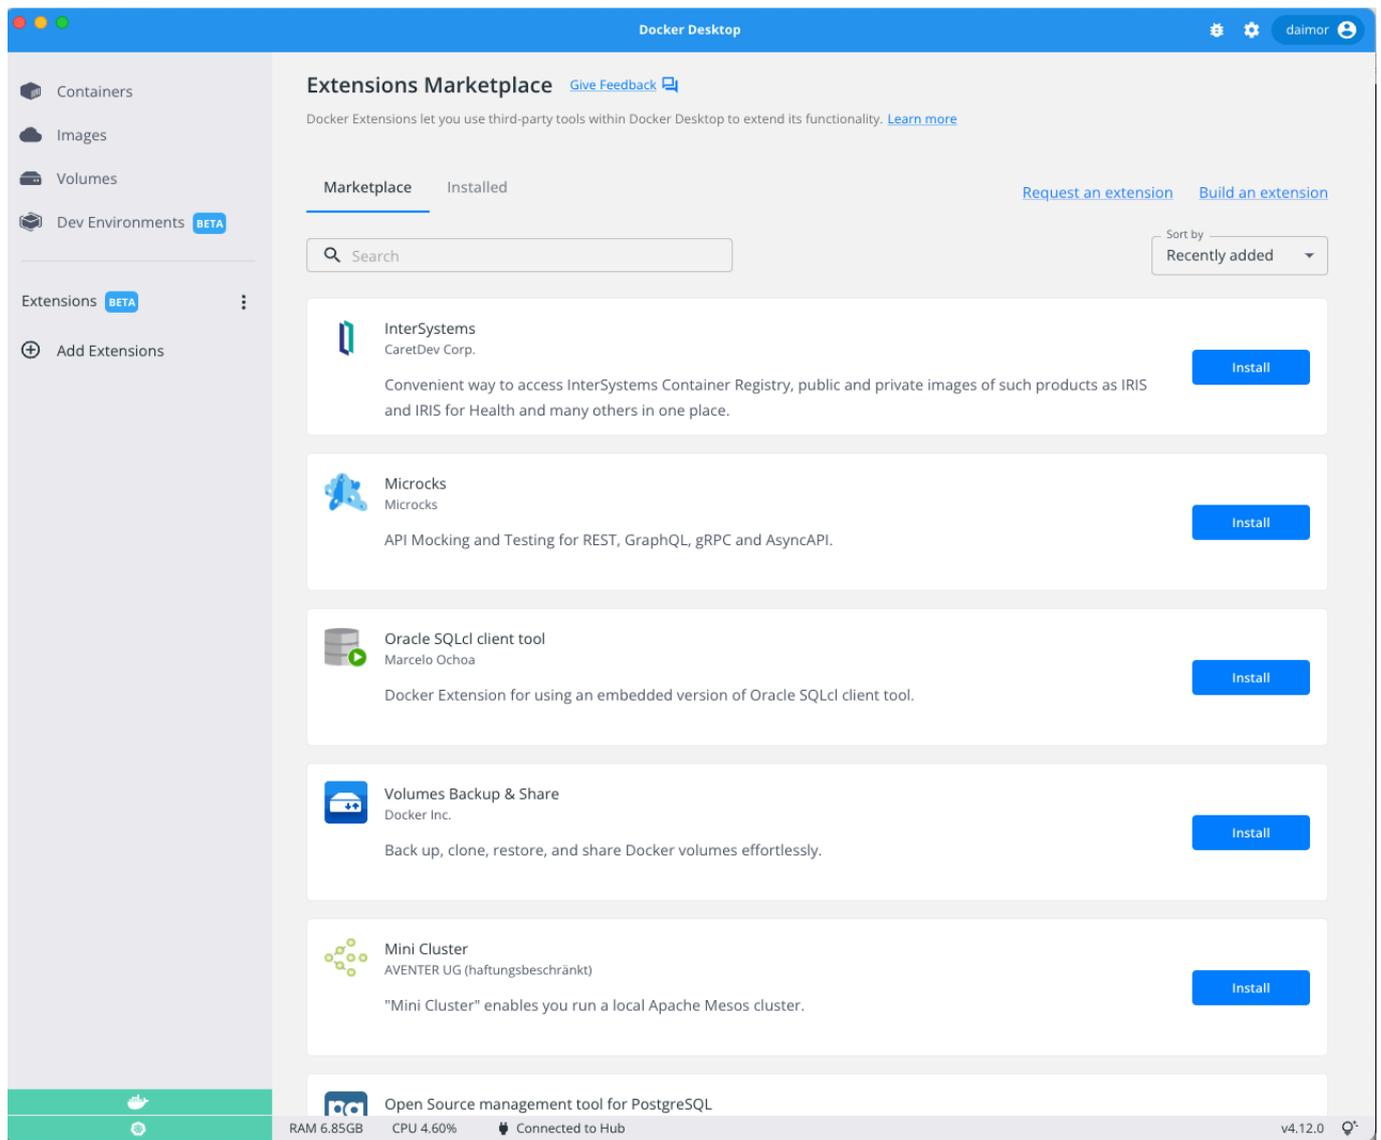

Great news, the extension to Docker Desktop for InterSystems Container Registry is now publicly [available](#) for everyone.

The screenshot shows the Docker Hub interface for the InterSystems extension. At the top, there's a search bar and navigation links for Explore, Pricing, Sign In, and Register. Below the navigation, the InterSystems logo is displayed with the text "By CaretDev Corp." and a description: "Convenient way to access InterSystems Container Registry, public and private images of such products as IRIS and IRIS for Health and many others in one place." A blue button labeled "Open in Docker Desktop" is present, with a note below it: "This requires Docker Desktop 4.10 or higher." The main content area is titled "Description" and shows a list of container images under the "IRIS" category. The list includes columns for "NAME" and "TAGS", with "Pull" buttons for each image.

NAME	TAGS	Actions
containers.intersystems.com/intersystems/iris-community	2022.1.0.199.0	Pull
	2021.2.0.651.0	Pull
	2020.4.0.547.0	Pull
containers.intersystems.com/intersystems/iris-mi-community	2022.1.0.199.0	Pull
	2021.2.0.651.0	Pull
	2020.3.0.304.0	Pull
containers.intersystems.com/intersystems/irishealth-aa-community	2020.3.0AA.331.0	Pull
containers.intersystems.com/intersystems/irishealth-community	2022.1.0.199.0	Pull
	2021.2.0.651.0	
	2020.4.0.547.0	
containers.intersystems.com/intersystems/irishealth-mi-community	2022.1.0.199.0	Pull
	2021.2.0.651.0	Pull
	2020.3.0.304.0	Pull

It is already available in the marketplace in Docker Desktop. It was published today, and it requires restarting Docker Desktop to see it.

Feel free to post any feedback in the GitHub repository, [here](#)
