Reviews on Open Exchange - Statistics

I produce my monthly Review Report on OEX packages now for 18 months.
These are a view figures and some comments:

- Total packages checked = 669
- Packages tested and reviewed by myself = 294
- Packages reviewed by other community contributors = 41
- Packages without review = 334
    - These are packages that promote partner products
    - or are mostly not available with a Docker set-up
    - or require resources unavailable to me (e.g. license keys)
    - or I simply didn't understand the subject (e.g most Health* subjects)

The availability of Docker containers allows me to keep clean my modest testing environment. Deleting containers is much easier than cleaning any other settings.

I hope you find these reviews useful for you when you run your own trials.
