Ens.DataTransform

Hi ,

I am Converting HL7 message into SDA3 format by using [Ens.DataTransform](#) Class but transformation is not happening while using this class and throwing the below error

ERROR <Ens>ErrException: <UNDEFINED>zTransform+1^Hosiptal.SDA3.DataTrans.1 *target -- logged as '-' number - '@' Set target.Patient.Name=source.GetValueAt("PID:5")'

Let me know if any mistake please refer the below code

```
Class Hosiptal.SDA3.DataTrans Extends Ens.DataTransform
{
```

```
ClassMethod Transform(source As EnsLib.HL7.Message, target As HS.SDA3.Container) As %Status
{
```

```
    Set target.Patient.Name=source.GetValueAt("PID:5")
    Set target.Patient.BirthGender=source.GetValueAt("PID:8")

    Set $ZT="Trap",tSC=$$OK
do {
$$$ASSERT(0) // Subclass Responsibility
Set tSC = $$$EnsError($$EnsErrNotImplemented,$$$CurrentClass,$$$CurrentMethod)
} while (0)
Exit
Quit tSC
Trap
Set $ZT="",tSC=$$$EnsSystemError
Goto Exit
}}
```

Thanks,

Smythee
