How to secure a REST API

I am trying to secure a rest service but I lack the understanding of how to achieve this if anyone will explain in details how I could achieve the following:

Securing The REST Service with Basic Auth (username and password)

if any one has a sample code on this will appreciate

#Access control #Authentication #REST API #Caché
Product version: Caché 2018.1
$ZV: Cache for Windows (x86-64) 2018.1.4 (Build 5051U) Thu May 28 2020 10:01:40 EDT [HealthShare Modules:Core:15.032.9035 + Linkage Engine:15.032.9035]
