[DICOM] InstitutionName is returned empty

Good morning,

We would like to share with you a doubt, and we would appreciate if you could read and answer us.

Currently we have a file titled: "Imagen PatientID 9358340 PatientName Milagros ReasonForStudy 350290 InstitutionName 350290 StudyDate 20220927.xml", in which we have the following InstitutionName:

```
<DicomAttribute keyword="InstitutionName" tag="00080080" vr="LO">
<Value number="1">350290</Value>
</DicomAttribute>
```

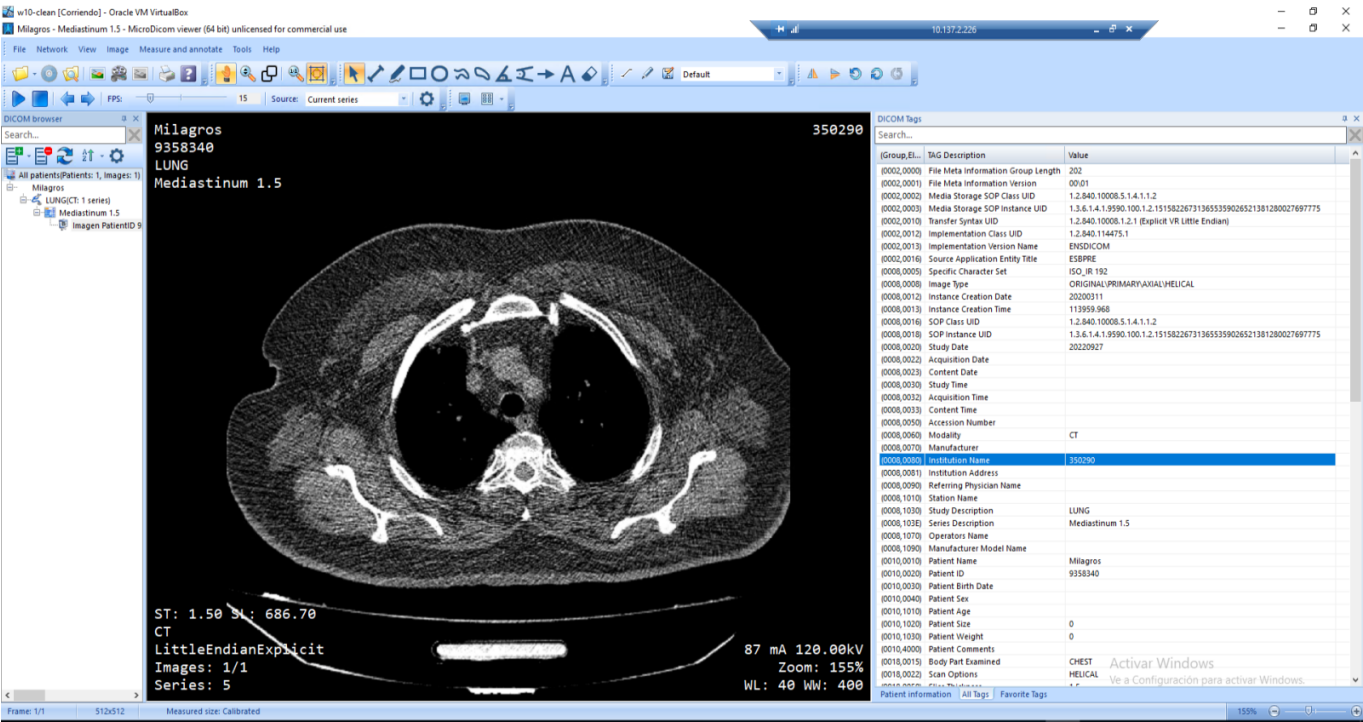

```
72 <DicomAttribute keyword="ReasonForStudy" tag="00321030" vr="LO">
73 | <Value number="1">350290</Value>
74 </DicomAttribute>
75 <DicomAttribute keyword="InstitutionName" tag="00080080" vr="LO">
76 | <Value number="1">350290</Value>
77 </DicomAttribute>
78 <DicomAttribute keyword="PatientID" tag="00100020" vr="LO">
79 | <Value number="1">9358340</Value>
80 </DicomAttribute>
81 <DicomAttribute keyword="PatientBirthDate" tag="00100030" vr="DA"/>
82 <DicomAttribute keyword="PatientSex" tag="00100040" vr="CS"/>
83 <DicomAttribute keyword="PatientAge" tag="00101010" vr="AS"/>
84 <DicomAttribute keyword="PatientSize" tag="00101020" vr="DS">
85 | <Value number="1">0</Value>
86 </DicomAttribute>
```

Once we generate the DICOM file using the command from the tool named "xml2dcm" inside the DICOM simulator package dcm4che:

```
./xml2dcm -x "Imagen PatientID 9358340 PatientName Milagros ReasonForStudy 350290 InstitutionName 350290
StudyDate 20220927.xml" -o "Imagen PatientID 9358340 PatientName Milagros ReasonForStudy 350290
InstitutionName 350290 StudyDate 20220927.dcm"
```

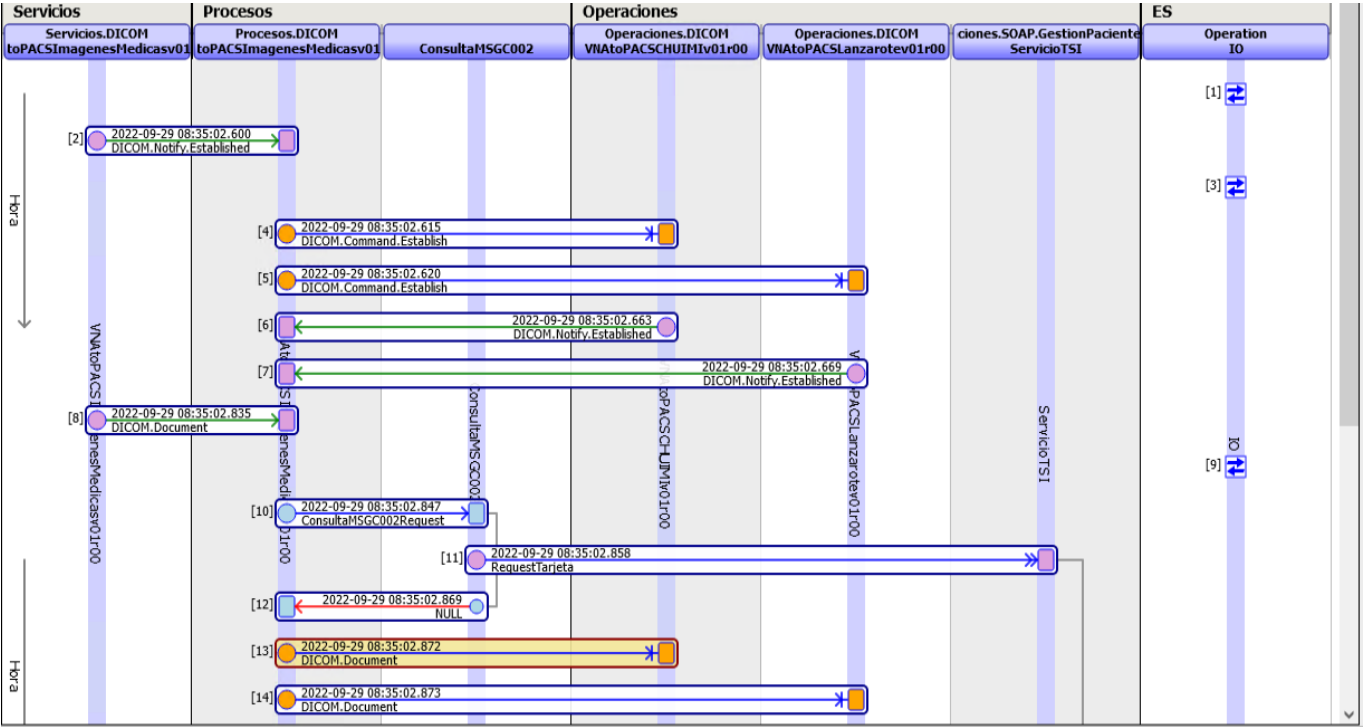

We obtain the image in a .dcm file.

When we open it in the viewer, it is shown InstitutionName = 350290

However, when we request from the ESB with HealthShare 2020 version, using PatientName = "Milagros" , the destination system which is being simulated from the dcm4che DICOM simulator, responds with this image indicating the InstitutionName without data, i.e., empty:

Request:

```

Response as seen from the ESB:

The ESB response shows the same as the simulator output, InstitutionName a (null)
