## JDBC Gateway Server CSP timeout issue

I was attempting to test a Linked JDBC View to MS SQL database and noticed I could not connect. When I look at the JDBC Gateway I noticed that at the Server Level it was down. However the page keeps timing out when ever I attempt to make any changes or start it, it will not respond.

I thought I had found the Cache command to start it but it will not start. Is the following steps correct?

```
PRODCLIN>set status = ##class(Enslib.JavaGateway.Service).StartGateway("/usr/java71_64/bin/java","","62972","/ensemble/ProdClin/logs/JDBC.log",0,"","192.0.0.1","","")
14:45:46.614:...vaGateway.Service: Starting Java Gateway with: Port=62972, JavaHome=/usr/java71_64/bin/java, ClassPath=, JVMArgs=, LogFile=/ensemble/ProdClin/logs/JDBC.log, JavaDebug=
PRODCLIN>write status
status=0. $!b($!b(5002,"<NOTOPEN>zRunCommandViaCPIPE+16*%Net.Remote.Utility.1",,,,,,,,,,$!b("PRODCLIN",$!b("zRunCommandViaCPIPE+16*%Net.Remote.Utility.1",,"e^zGetJavaVersion+11*%Net.Remote.Service.1",,"e^zGetRequiredClassPath+3*%Net.Remote.Service.1",,"e^zCmdLineForJava+59*%Net.Remote.Service.1",,"e^zRunJava+23*%Enslib.JavaGateway.Service.1",,"e^zStartGateway+10*%Enslib.JavaGateway.Service.1",,"e^0"))))/* ERR
OR #5002: Cache error: <NOTOPEN>zRunCommandViaCPIPE+16*%Net.Remote.Utility.1 */
```

## #JDBC #Caché

Product version: HealthShare 2018.1

\$ZV: Cache for UNIX (IBM AIX for System Power System-64) 2018.1.3 (Build 414U) Mon Oct 28 2019 11:24:02 EDT
