[Off-Topic] How would you encourage or teach your passion about computers and electronics / and or programming to your kids or teens, or even adult sons / daughters?

Hello,

Thank you for reading this question, and thank you for your time and replies.

I was wondering which ways, tools, mechanisms, or vias would you recommend to teach to kids, teens, adults, being your sons / daughters or not; your passion or likelihood for programming and computers?

I know there are some programming free games like the following ones:

<https://seshoumara.itch.io/the-stack-machine>

<https://wintrmut3.itch.io/maelstromexe>

<https://importantlittlegames.itch.io/codemancer-ch-1>

<https://volutedberet.itch.io/the-ocean-cleanup-project>

<https://yeoyeo.itch.io/buggy-code>

<https://elgregos.itch.io/just-push-the-button>

However, what would you suggest, recommend, to teach or share with other people your interest in computers and programming?

Thanks for your replies.

Greetings.
