How much memory will it take to use maxlen for String type?

Hi Friends,

If I created Property as below

Property Abc as %String (Maxlen = 3000000)

how much space will be used in cache DB, if assigned "hello" to Abc?

The cache will use 3000000 bytes or 5 bytes?

This conformation is very important for my implementation

Thanks,

Prashanth
