Export to Excel with GenerateReport()

Hi Guys,

I'm exporting a Zen report to excel using the following : SET
Status=rpt1.GenerateReport("c:\temp\Instruments.xls",10)

and it's working ok but I'm getting extra fields that they shouldn't be there.

here is the correct html format :

Item Processed Report

and I'm guessing that those extras are coming from these attributes and elements, so how can I exclude those extra fields?

```
